- UX/UI
- MySQL
- Node JS
- Testning (jest, cypress)
- React

Experience

Administrator

Juni 2019 - aug 2019

Fastighetsanställdas Förbund

I was helpful with copying, archiving, and sorting mail and contracts. Lighter cleaning also occurred.

Language

Swedish

English

Education

Fullstack Course 2022

Kindred Gambling, Sweden, Stockholm

During ten weeks at the beginning of March, I learned how to run projects, program development, testing, and database building. In the picture further down, I presented my project on the same concept as Twitter. I named my database application A-Chat.

Gymnasieexamen 2019-2022

LBS Kreativa Gymnasiet, Sweden, Stockholm

I programmed both in two- and three-dimensional environments. Through my measurements and calculations, I learned advanced techniques for simulating physics and effects in games, among other things. I had the opportunity to develop games in current PC development environments. My grades were consistently B and C.

Yh-examen, Frontend developer 2023-2025

Medieinstitutet, Sweden, Stockholm

During my training, I gained knowledge of beginner-level web technologies such as HTML, CSS, and JavaScript. Later on, I advanced my skills and learned about frameworks and libraries like React or Angular. Additionally, I gained an understanding of usability principles and responsive design.
